Pet Tinder

Sprint 3: Reflection

Teamwork

Teamwork

- Keeping to a overall schedule.
- Being accountable for our parts of the project.
- Offering help to each other.
- Ensuring that no one os overburdened with work.
- Asynchronous workstyle allows for tasks to be done on time within our own schedules.

Obstacles

Obstacles

———

- Available time
  - Other classes
  - Family
  - Work
- Scope of work
- Unexpected difficulties
  - Family problems
  - Renovations at home
- Microsoft / Adobe Program Errors
  - Communication using Teams

Design Changes

Design Changes

———

- Our design hasn't changed since the conception of our project.
  - We kind of just ran with the idea from the start.
  - Second sprint had us cementing our design choices.
- We have improved our understanding of animal fostering and adoption, but our idea stayed the same.
  - The whole of the first sprint.
- Our goal has remained the same:
  - Make adopting animals easier and less intimidating.

Team Opinions

Team Opinions

___

- Team composition works well
  - Thomas handles the scheduling and ensuring we're on track
  - Everyone gets their parts done on time
  - In the beginning, there was a good mix of talents to allow whatever topic we wanted.
- Each member is accountable and communicable
- Asynchronous workflows allow each team member to put out their best work when they have the time to work towards our goals.

Project Goals

Project Goals

———

- Mobile app prototype in Adobe XD
  - Homepage
  - Pet page
  - Adoption form and registration
  - Navigation
  - Pet profile page
  - Content to populate placeholders
- Video demonstration of app in use - mockup
  - Use XD prototype to approximate the use of the app.
  - Primarily After Effects and Premiere Pro.

Final Thoughts

Final Thoughts

- Many shelters and rescue centers.
  - Even as a prototype this would help kickstart the idea of centralizing the adoptions allowing more animals to find their furever homes instead of being strewn across multiple centers.
- The possibility that this project catches the eye of a rescue center / rescue society that would want this app to be real.
